

YINING MAO

Chicago, IL | 617-319-8549 | ynmao@uchicago.edu | github.com/ymao21

EDUCATION

THE UNIVERSITY OF CHICAGO

Master of Science in Applied Data Science | GPA: 4.0/4.0

- Schmidt AI in Science Hackathon Winner; Student Ambassador; Gargoyle Consulting Club member

Chicago, IL
Expected Dec 2026

BOSTON COLLEGE

Bachelor of Arts in Economics; Minor in Mathematics

- Led cross-university cultural programming as Events Director of Asian Caucus

Chestnut Hill, MA
May 2021

EXPERIENCE

ISACA

Enterprise Risk Management Intern

Chicago, IL
Jun 2026 – Aug 2026

Supported enterprise risk transformation: AI-assisted review, platform evaluation, and OneTrust implementation.

- Translated an ambiguous business request into a structured AI-assisted RCSA review MVP; designed completeness checks, composite scoring, and escalation logic grounded in ERM frameworks to cut manual review and improve consistency
- Evaluated Microsoft Copilot, Claude, and an internal GPT environment across output quality, privacy, governance risk, and usability; presented findings, limitations, and implementation recommendations to risk and technical stakeholders
- Configured and documented 5+ OneTrust workflows spanning RCSA, risk register, root-cause analysis, key risk indicators, and product risk assessments, standardizing risk taxonomy for repeatable, reporting-ready use by ERM and IT teams

STATE STREET CORPORATION

Alpha Portfolio Services Associate

Boston, MA
Jul 2024 – Sep 2025

Early member of a growing portfolio-services team supporting global investment data operations.

- Developed 20+ standard operating procedures with Data Operations, Technology, and Client Services teams, creating repeatable workflows that supported a 95% on-time completion rate
- Built root-cause tracking dashboards for recurring operational issues, giving leadership clear visibility into workflow status and contributing to a 20% reduction in escalations
- Analyzed Master Service Agreements to identify discrepancies, workflow bottlenecks, and operational risk, informing procedure updates and stronger process controls for investment-data delivery

Senior Associate, Professional Development Rotational Program

Jul 2021 – Jun 2024

Rotations across Credit & Market Risk, Algorithmic Trading, AI & Automation, and Talent Acquisition.

- Analyzed loan-request data spanning 300+ variables and developed 10+ visualizations that made credit exposures visible to risk managers for monitoring and quantitative reporting
- Automated breach alerts for risk monitoring, reducing manual compliance review time by 25%
- Refactored 100+ code functions and built REST API integrations, improving scalability and accuracy of reporting tools
- Synthesized survey and performance data into 10+ analytical reports and executive presentations, defining 5+ evaluation metrics that guided program decisions

SELECTED PROJECTS

Verizon Device Financing Credit Risk Analysis

- Structured a credit-approval problem for ~12,000 device-financing applications (2020–2025), defining 90+ day delinquency as the default outcome and framing analysis around approval decisions
- Compared predictive models and recommended logistic regression as the best tradeoff among performance, interpretability, and implementation feasibility for credit decisioning
- Calibrated approval thresholds to balance credit-risk exposure against portfolio growth; projected ~\$25.75 per applicant in incremental cash flow at a one-million-applicant scale under the recommended strategy

Clinical Knowledge Graph Multi-Agent System

- Structured an ambiguous clinical-data problem into an ontology-driven multi-agent system converting unstructured clinical text into a validated, queryable knowledge graph
- Combined five language-model agents with deterministic validation to catch extraction errors; achieved a 0.933 composite evaluation score and ~0.73 entity-level F1, and communicated performance and tradeoffs

ADDITIONAL INFORMATION

Technical: Python, SQL, R, machine learning, statistical analysis, PySpark, Tableau, Power BI, GCP, OneTrust, Excel

Certification & Languages: Securities Industry Essentials (SIE), May 2024 | Mandarin (native), English (fluent)

Interests: Snowboarding and skiing, indoor and outdoor bouldering, outdoor endurance activities
